(a) Uniform mesh: different orders
Exact Gaussian W_2
Euler steps N
Endpoint
$t = 1/4$
Maximum over nodes
(b) Endpoint depends on the mesh
Endpoint W_2
Euler steps N
Cosine, uniform
Cosine, quantile
AP control, quantile
(c) Interior first-order error
$NW_2(t)$
Time t
$N = 64$
$N = 256$
$N = 4096$
Predicted limit
